## Did you know?

- CANTOX has been in the consulting business since 1985
- We currently have a full-time staff of over 60 regulatory and technical specialists, located in offices in the United States, Canada, and Europe
- We have clients or projects in 120 countries across 6 continents
- ~80% of our work is repeat business or direct referrals

## We help clients understand & comply with:

- International New Chemical Notification Programs
- International Product-Safety & Hazard-Communication Programs

### Understanding and Complying with International New Chemical Notification Regulations

- Interpret and explain Notification Schemes
- Classify Substances to determine the need for, and nature of, pre-manufacture/pre-import/pre-market notifications
- Develop Notification Strategies that meet clients' needs for regulatory compliance and business expansion
- Defend Waiver Requests and Surrogate Data via "read-across" approaches and method variations
- Design, Implementation and Stewardship of Testing Programs to fill data gaps
- Prepare Notification Dossiers that ensure prompt acceptance and assessment by the authorities
- Lead or Support Pre- and Post-Notification Consultation with the regulatory authorities
- Support Legal Advisors by providing experienced insight into resolving issues of notification non-compliance

### International Product Safety and Hazard Communication

- Interpretation of Hazard Communication Legislation
- Conducting Literature Searches to make full use of existing information
- Design, Implementation and Stewardship of Testing Programs
- Classification of Substances to determine the need for, and nature of, labeling and documentation
- Authoring, Maintenance and/or review of MSDS and Labels
- HMIRA Submissions for Confidentiality Claims in Canada
- MSDS and Label preparation and Classification Workshops

### We're Here to Help!

For more than 25 years, CANTOX's Chemicals Group has been providing the chemical industry with our leading-edge advice and practical solutions, which address the growing demands for "new-and-improved" products that are useful, cost-effective, and environmentally sound.

- Our services are flexible, available only when needed, and at the level of expertise required.
- Our depth of technical, regulatory, and administrative resources ensures that we can be timely and effective when dealing with the need for multiple notifications or classifications that may arise simultaneously.
- Our Chemicals Group has considerable experience at developing "read-across" and waiver rationales that minimize the necessity for expensive laboratory trials, thus saving your company time and money.

Our bottom line is this: we are committed to excellence in product registration and safety evaluation, and we continue to succeed in providing practical advice to clients in the areas of regulatory compliance and product safety.
